

Cabells becomes a member of United Nations SDG Publishers Compact

Cabells has been accepted as a full member of the United Nations SDG Publishers Compact, becoming one of the first US organizations and non-primary publishers globally to be awarded membership. Cabells joined the initiative as part of its ongoing commitment to support research and publications focused on sustainable solutions.

The UN compact was launched at the end of 2020 as a way to stimulate action among the scholarly communications community. It was launched in collaboration with the International Publishers Association (IPA) with the aim of speeding up progress towards the UN's 17 Sustainable Development Goals (SDGs) by 2030.

As a signatory of the Publishers Compact, Cabells commits to developing sustainable practices and playing a key role in its networks and communities as a champion of the SDGs during what is becoming known as the 'decade of action' from 2020–2030. As such, Cabells is developing a number of solutions designed to help identify SDG-relevant journals and research for authors, librarians, funders, and other research-focused organizations.

Cabells' Director of International Marketing & Development, Simon Linacre, said: "The UN SDGs have already done a remarkable job in directing funding and research to the most important questions facing our planet at this time. Becoming part of the UN SDG Publishers Compact will inspire Cabells into further playing our part in meeting these grand challenges."

ABOUT CABELLS

Cabells generates actionable intelligence on academic journals for research professionals. On the Journalytics platform, an independent, curated database of more than 11,000 verified scholarly journals, researchers draw from the intersection of expertise, data, and analytics to make confident decisions to better administer research. In Predatory Reports, Cabells has undertaken the most comprehensive and detailed campaign against predatory journals, currently reporting on deceptive behaviors of over 14,000 publications. By combining its efforts with those of researchers, academic publishers, industry organizations and other service providers, Cabells works to create a safe, transparent, and equitable publishing ecosystem that can nurture generations of knowledge and innovation.
