

## Cabells and scite partner to bring Smart Citations to Journalytics

**Cabells**, a provider of key intelligence on academic journals for research professionals, and **scite**, a platform for discovering and evaluating scientific articles, have partnered to bring scite's Smart Citations to Cabells Journalytics publication summaries.

Journalytics is a curated database of over 11,000 verified academic journals spanning 18 disciplines, developed to help researchers and institutions optimize decision-making around the publication of research. Journalytics summaries provide publication and submission information and citation-backed data and analytics for comprehensive evaluations. scite's Smart Citations allow researchers to see how articles have been cited by providing the context of the citation and a classification describing whether it provides supporting or disputing evidence for the cited claim.

Lacey Earle, executive director of Cabells, says, "Cabells is thrilled to partner with scite in order to help researchers evaluate scientific articles through an innovative, comparative-based metric system that encourages rigorous and in-depth research."

Josh Nicholson, co-founder and CEO of scite says of the partnership, "We're excited to be working with Cabells to embed our Smart Citations into their Journalytics summaries. Smart Citations help you assess the quantity of citations a journal has received as well as the quality of these citations, with a focus on identifying supporting and disputing citations in the literature."

### ABOUT CABELLS

Cabells generates actionable intelligence on academic journals for research professionals. On the Journalytics platform, an independent, curated database of more than 11,000 verified scholarly journals, researchers draw from the intersection of expertise, data, and analytics to make confident decisions to better administer research. In Predatory Reports, Cabells has undertaken the most comprehensive and detailed campaign against predatory journals, currently reporting on deceptive behaviors of over 14,000 publications. By combining its efforts with those of researchers, academic publishers, industry organizations and other service providers, Cabells works to create a safe, transparent, and equitable publishing ecosystem that can nurture generations of knowledge and innovation.

### ABOUT SCITE

scite is a Brooklyn-based startup that helps researchers better discover and evaluate scientific articles through Smart Citations—citations that display the context of the citation and describe whether the article provides supporting or disputing evidence. scite is used by researchers from dozens of countries and is funded in part by the National Science Foundation and the National Institute of Drug Abuse of the National Institutes of Health.
